EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the title

The title has been changed to APPARATUS FOR EDGE WRAPPING AN AIRCRAFT INTERIOR PANEL

In the specification

paragraph 0001 line 2, "09/792,483" has been changed to -- 09/972,483 -- and after "October 5, 2001," has been inserted -- now U.S. Patent 6,673,187, -- .

2. The following is an examiner's statement of reasons for allowance: Bolesky (3,325,329) and Japanese Patent Application 5-220830 A disclose examples of panel edge wrapping apparatus similar to the claimed apparatus but wherein the translation of the panel support so that the blanket wraps around the edge of the panel moves the support downward to *close* a preexisting gap rather than opening a gap as claimed. Ritter (1,971,384) and Whitehouse (1,980,022) disclose examples of the conventional apparatus wherein the panel edges extend beyond the edges of a stationary pedestal support to facilitate wrapping of the panel edges with a cover layer using a vacuum bladder press. Mitchell (2,049,970) and Newton (3,551,239) are cited of interest for showing edge wrapping using a translating work support. The prior art of record fails to disclose or suggest applicants' apparatus, including the particular controller translating the support to open a gap so that the silicone blanket can wrap the laminate around the edge and into contact with the adhesive on the back surface, in the claimed environment.
